

FRP Grating Packaging and Handling

Visual reference sheet showing packaged FRP grating units and handling presentation for transport, storage, and site delivery.

DOCUMENT TYPE

Handling Guide

PRODUCT

FRP Grating

FORMAT

Visual Reference

OVERVIEW

This document presents example packaging and handling arrangements for FRP grating panels. The images show palletised stacks secured for transport and illustrate the general presentation of packed material during storage and mechanical handling.

Palletised and wrapped FRP grating units prepared for transport

Visible packaging features include stacked pallet arrangement, protective wrapping, strapping, and edge protection around the bundled grating panels.

Handling Reference Images

Additional packaging and lifting views showing support, wrapping, and pallet-based handling of FRP grating units.

PACKAGING AND HANDLING VIEWS

Forklift-supported handling of a wrapped grating bundle

Stacked and banded grating units on timber pallets

HANDLING OBSERVATIONS

- Bundles are supported on timber pallets to keep the grating elevated during storage and movement.
- Protective wrapping and strapping help maintain bundle stability during transport and site delivery.
- Edge framing is used to protect the sides of the stacked grating panels.
- Mechanical handling is carried out with suitable lifting equipment supporting the bundle from below.
- The document serves as a visual reference for the packaged condition of the supplied material.

DOCUMENT NOTE

This document illustrates pallet support, protective wrapping, strapping, and handling presentation for packaged FRP grating bundles.
